SUMMARY

I am currently a final-year student at Deakin University, having spent four years engaging with the field of data science both in Vietnam and Australia. During this time, I have had the opportunity to develop and hone my professional skills through numerous courses and personal projects, including programming, data analysis, machine learning, and even more. I believe it is time for me to apply my knowledge to create value and solve real-world problems. Therefore, I am seeking an internship opportunity in the field of Data Science to prove and further refine myself.

EDUCATION

Deakin University

Feb 2023 – present (expected graduation: June 2025)
Melbourne, Australia
Bachelor of Business Analytics
GPA: Distinction

Da Nang University of Economics

Sep 2020 – Jan 2023
Da Nang, Vietnam
Bachelor of Data Science and Business Analytics
GPA: 3.55

SKILLS

- Data Manipulation: Python, SQL, Excel
- Data Visualization: Tableau, PowerBI, Seaborn
- Database Managing
- Machine Learning, Deep Learning
- Cloud Computing: Azure
- Statistics: Hypothesis testing, Estimation statistics
- Web Application: Django, Streamlit
- Data Scraping: Selenium, BeautifulSoup, Request
- Project Management: Agile Framework, Jira
- Git, Microsoft Office

CERTIFICATES

- LinkedIn Power BI Training (Apr 2024) [view](#)
- IELTS 7.5 (Oct 2022) [view](#)
- Hackerrank SQL (intermediate) certificate (Aug 2022) [view](#)
- Hackerrank Python (basic) certificate (Aug 2022) [view](#)

PROJECTS

Data GotTalent Contest 2024: Cinema Data Analysis and Dashboard [dashboard](#) [github](#)

Jan 2024

- Analyzed a dataset consisting of 40,000 records across 3 tables, revealing insights into business problems using statistical techniques in **Python**.
- Designed and implemented a business database hosted on **Azure**, including an Extract, Transform, Load (**ETL**) pipeline.
- Developed a **Streamlit** dashboard that displayed comprehensive information on 4,479 cinema members, along with total sales figures of 1.6 million VND for 19 movies.

Denmark Airbnb: Exploratory Data Analysis [kaggle](#) [github](#)

Nov 2023

- Analyzed data distribution, variable correlations, price differences, and customer satisfaction using **statistical** methods, revealing higher average satisfaction in Sealand compared to the rest of Denmark at a 95% confidence level.
- Developed a classification model for apartment pricing using **scikit-learn**, achieving an accuracy of 75.3% and a recall of 74%.
- Prepared an **analytical report** for management, summarizing key findings and insights.

Amazon Product Analysis: Customers' Review Scraping and Sentiment Analysis [github](#)

Dec 2022

- Scraped and analyzed 18,000 customer reviews from Amazon using **Beautifulsoup** and **Selenium**.
- Preprocessed and vectorized text data using Natural Language Processing (**NLP**) techniques with **gensim**, **word2vec**.
- Configured a Convolutional Neural Network (**CNN**) with **Tensorflow** to classify customer sentiments into 3 classes, utilizing a 5-layer architecture.

Wine Quality Classification Model: Deployed with Django and Hosted on Azure [github](#)

Oct 2022

- Built and deployed a model for classifying wine quality using **scikit-learn** models, achieving a model accuracy of 83.25%.
- Deployed the model using a web app created with **Django**, where users can input 9 features of wine bottles on Django to receive a quality prediction.
- Hosted the web app utilizing **Azure App Service** for seamless accessibility.
